BHARAT SIRMAL

sirmalbharat99@gmail.com | Linkedin | Github | Portfolio-Bharat Sirmal | Mumbai, Maharashtra, India

EDUCATION

B.Tech in Computer Science — Pillai College of Engineering, Panvel *2023 – 2027*
CGPA: 8.74 / 10.0

Class 12 (Higher Secondary) — KMC Balkumari, Lalitpur Nepal *2020 – 2022*
GPA: 3.14 / 4.0

SKILLS

Programming Languages: Python, JavaScript,C++, SQL
Data & Databases: MongoDB, MySQL, SQL querying
Productivity & Tools: Microsoft Excel, Google Sheets, Postman, GitHub, Cloudinary
Cloud & Platforms: Google Cloud (Data Analytics), Firebase, Vercel

PROJECTS

YAOP Community Platform

- Designed and managed a centralized MongoDB database, organizing structured data for events and volunteers with full accuracy and consistency across all records.
- Processed and validated donation entries with complete data integrity by implementing Firebase authentication and structured data workflows.
- Built an admin dashboard that streamlined data entry and record updates, reducing manual effort by ~40% and minimizing input errors.
- Technologies: Next.js, Express.js, MongoDB, Firebase, Cloudinary

FrameForge Gaming Platform

- Designed and maintained structured MongoDB schemas for users, products, and orders, ensuring clean, queryable, and consistent records.
- Engineered RESTful APIs to handle high-volume CRUD (create, read, update, delete) data operations reliably and efficiently.
- Implemented role-based data access control, enforcing strict segregation between admin and user records with zero unauthorized access.
- Conducted data validation and performance testing using Postman to verify the accuracy and integrity of all API data flows.Collaborated in a 4-member team using Git for version control and task coordination.
- Technologies: React.js, Express.js, MongoDB, Firebase, REST APIs, Postman

INTERNSHIP

Web Development Internship | May 2026 – Jun 2026
Company Name: InAmigos Foundation
Assisted in developing and maintaining the organization's website using HTML, CSS, and JavaScript. Designed and implemented new features to enhance site functionality, and improved the layout and structure to make the website more visually attractive and easier to manage.
Technology Used: HTML, CSS, JavaScript,React, Node.js, MongoDB

CERTIFICATIONS & ACHIEVEMENTS

- **Google Cloud Data Analytics Certificate** — Hands-on experience with cloud-based data pipelines, data analysis, and structured reporting tools.
- **Google Cloud Career Launchpad (Foundations Track)** — Training in cloud computing fundamentals, data management, and analytics best practices.
